

Monitor trailer

THIS MONITOR TRAILER CAN BE DIRECTLY PLUGGED INTO HYDRANT SYSTEM. THEREFORE, IT IS AUTONOMOUSLY OPERATED IN ORDER TO ACHIEVE THE COOLING OF THE DANGER ZONE.

MONITOR TRAILER

- Trailer : Simple axle
- Drawbar : Articulated
- PTAC : 500 kg
- Cannon Water Flow : 3000 l/mn
(other flow rates possible)
- Storage Box : 2 to 4 hoses DN 100

BENEFITS

- ⊕ Individual water supply thanks to check valves on each water intakes.
- ⊕ Compact size and light weight so as the trailer is towable without trailer license
- ⊕ 4 telescopic landing gears with screws
- ⊕ Angled water intake connector accessible thanks to an inspection hatch
- ⊕ Antiskid floor

OPERATING PRINCIPLE

Each water intake is individual. Once the necessary hoses connected, the regulation valve located under the cannon allows to open or close the water flow. The 4 landing gears allow to stabilize the trailer during the water discharge. The cannon is manually operated and oriented on the fire.
